

Mr. Hans-Arild Bredesen

Manager, Econ Pöyry

Born in 1968, citizen of Norway

Education: MSc in Computer Science, Høgskolen i Østfold

Position: Principal

Location: Pöyry Management Consulting (Norway) AS, Oslo

Profile - Management consulting

- Project management and quality assurance
- IT-systems and IT-architecture in the energy market
- Analysis and evaluation of power markets
- Strategies and business development in deregulated electricity markets

Hans-Arild Bredesen has been involved in the electricity deregulation process since 1992. He has held key positions in the implementation and delivery of IT systems to the California Power Exchange. The systems included Day-ahead spot market, Settlements, and Forward markets. Prior to this, Hans-Arild has been involved as technical project manager developing the market systems at Nord Pool and Statnett as well as participating in the development of different participant systems in the Nordic market.

In his work in the international arena, Hans-Arild has investigated international markets and had key roles in the development of product strategies for Trading, Scheduling, and Settlement systems for power exchanges and system operators in India, Romania, Turkey, Ireland, Northern Ireland, Southern Africa, France, Lithuania, Central and South-east Europe among others.

Hans-Arild has been appointed Certified Engagement manager based on actual results in the projects he has been involved in.
