

Mr. (Prof.) Li Junfeng

Deputy Director General of Energy Research Institute & Secretary General of China Renewable Energy Industries Association

Li Junfeng is Professor and Chair of the Academic Committee of the Energy Research Institute and is currently serving as Deputy Director. Prof Li's work focuses on renewable energy and on climate change issues such as technology transfer, the Clean Development Mechanism (CDM) and carbon trade. He headed the first CDM project in China and is the focal point in East Asia for the global Renewable Energy and Energy Efficiency Partnership, as well as working closely with the World Bank, UNDP, Global Environment Facility and other programmes for renewable energy development in China.

Prof Li chaired the Sustainable Energy Task Force of the Chinese High Technology 863 Programme and facilitated the implementation of the national high technology programme for Wind and Solar PV within the tenth five-year plan. He was a member of the Hydrogen Task Force of National High Technology 973 Programme. Meanwhile, he was the chief author of the Chinese Renewable Energy Law and has written numerous papers and reports on renewable energy, carbon trade and others issues.

Prof Li is General Secretary of the Chinese Renewable Industrial Association, Vice-Chairman of the Global Wind Energy Council and Vice-Chairman of REN 21, among other positions. He graduated from the Shandong Mining Institute in 1982.
