

Mr. Luis Crespo
Secretary General, Protermosolar
Spain

Mr. Luis Crespo holds a doctorate degree in Aeronautical Engineering from Polytechnica University, Madrid and Diploma in Sociology from University of Comptense, Madrid, Spain. He started working in space division of Construction Aviation S.A, promoting and managing renewable energy projects. He was also incorporated into ASINEL (UNESA) as head of new technologies, where he directed Energy projects like Spanish-German wind turbine of 1 MW and central Air-cooled Thermo Gast. He served as a director in Institute of Renewable Energy. In 1990 he left the field of renewable energy to address other areas and become part of CDTI as deputy director of studies and technology transfer. Subsequently he was appointed Director General of Spanish Association of New Technologies to enhance synergies and development of associated companies. In 1992, he was appointed as managing director of the Corporacion Empresarial de Extremadura S.A, to promote regional development by providing capital to launch new business.
