

Mr. Ryan Glenn Anderson

Advisor and Team Leader on Renewable Energy Finance, Norwegian Agency for Development Cooperation (Norad)

Mr. Anderson is a development economist specialized in public-private partnerships in infrastructure and renewable energy finance. His work has encompassed policy reform, local capacity building, financing and project implementation within the power sectors of developing countries. He has experience from all sides of promoting and pursuing private investments in renewable energy in emerging markets in a range of countries, including Tanzania, Liberia, Zambia, Georgia and India.

He is currently the Team Leader on Renewable Energy Finance at Norad, encompassing hydropower PPPs in Nepal, Liberia and Sudan, as well as innovative off-grid renewable energy programs in India and globally.

His career goal is to contribute to; i) ensuring large scale private investments to mutual benefit for investors and the poor, and ii) rolling out of renewable energy solutions in poor countries.

Specialties

- Renewable energy project financing (including carbon financing)
- Public-private partnerships (PPPs) in infrastructure in developing countries
- Off-grid electrification business models
- Power sector reform
- Development assistance policy
